

Thou shalt not raise a false report; put not thine hand with the wicked to be an unrighteous witness.—Exodus 23:1.

Arkansas—Fair and continued warm Saturday night and Sunday.

LITTLE ROCK HOTEL BURNS

BEHIND THE SCENES IN WASHINGTON

By Rodney Dutcher

Only 7 of Third Parties Ever Got an Electoral Vote

Anti-Masonic Party, in 1832, Was First, With 7 in College

BULL MOOSERS 88

Colonel Roosevelt Came Nearest of All—Populists Got Only 22

WASHINGTON.—(AP)—No third party candidate ever has been elected president. Only seven have rolled up sufficient strength to break into the electoral college vote. Those were:

William Wirt, 1832. Anti-Masonic party, seven electoral votes.

Millard Fillmore, 1856. Know Nothing, eight electoral votes.

J. C. Breckenridge, 1860. Secessionist Democratic, 72 electoral votes.

John Bell, 1860. Constitutional Union, 39 electoral votes.

James B. Weaver, 1892. People's party (Populist), 22 electoral votes.

Theodore Roosevelt, 1912. Progressive (Bull Moose), 88 electoral votes.

R. M. La Follette, 1924. Progressive, 13 electoral votes.

The Winning Parties

Political parties which have elected presidents are:

Federal, 1787-1816—Formed from the Strong Government, or Constitutional party.

Democratic-Republican, 1792-1828—Formed from the Anti-Federal (1787-1793), the Republican, or Jeffersonian party (1791-1793) and Democrats or sympathizers with the French Revolutionists (1791-1793).

Coalition, 1825—Formed from a union of the supporters of Henry Clay with those of John Quincy Adams.

Democratic, 1828—The Democratic-Republican party divided into four parts in the campaign of 1828, and never reappeared again in a national contest. The Democratic and National-Republican parties were constructed out of its ruins and perfected organizations.

Opposed Jackson

Wright, 1834-1854—Formed from a union of the National-Republicans, the nullifiers, extreme states' rights men, anti-Masons and the personal opponents of Andrew Jackson.

Republican, 1854—Formed from a greater part of the northern Whigs, free soldiers—both of Democratic and Whig antecedents—anti-Slavery Democrats and anti-slavery men of the Democratic party—on the slavery issue.

Peace Treaty for Germany, Austria

Formal Announcement Expected by Europe Over the Week-End

BERLIN, Germany.—(AP)—A far reaching agreement between Germany and Austria, a usually reliable source said Saturday, will be proclaimed to the world Saturday night.

Enough of the text became known to indicate that the two nations had buried the hatchet.

FLAPPER FANNY SAYS:

REG. U. S. PAT. OFF.

A bang-up argument follows explosive words.

Television's Dream Is Coming True

Iconoscope Is Put in Broadcast Test; Sale Is Uncertain

"Bugs" Must Be Eliminated—May Take Year, or Four or Five

NEWEST MIRACLE

No More Flicker in Television Picture Than in a Good "Movie"

By GEORGE A. WIEDA
NEA Service Staff Correspondent
NEW YORK.—Twelve hundred feet above the sidewalks of Manhattan a new industrial giant is being born.

At last this most spectacular of modern scientific marvels is a sure thing. For 75 years the secret of television eluded the most assiduous research. Then Dr. Vladimir Zworykin, ace inventor of the Radio Corporation of America laboratories at Camden, N. J., perfected the iconoscope, a device so astoundingly ingenious that it removed at one stroke every obstacle to the technique of transforming pictures into electrical impulses, and their reconstruction by a receiver.

As soon as the new television giant dares its swaddling clothes you will be able to sit in your home and witness any spectacle that is within reach of the iconoscope, the electric eye of the television camera—an eye keener, more perceptive than the most perfect human eye, one that cost nearly \$5,000,000 to develop.

How soon will you be able to install a television receiver in your living room? That's the question to which engineers seek the answer in a lofty laboratory atop the Empire State building. In a carefully guarded studio they labor in secret to find out how well the iconoscope system works under actual broadcast conditions. With a 10 kilowatt transmitter, operating on a six-meter wave band, they are broadcasting pictures that can be picked up only by the experimental receiving sets installed at selected points in the metropolitan area.

May Be Five Years Away
These engineers haven't any more idea than you have about how long it will take to get rid of the "bugs"—the electrical and physical difficulties—that broadcast conditions may reveal. Until the bugs are eliminated, there'll be no television on the market.

The less optimistic engineers put the time required for perfecting the apparatus at four or five years. The hopeful ones say perhaps a year.

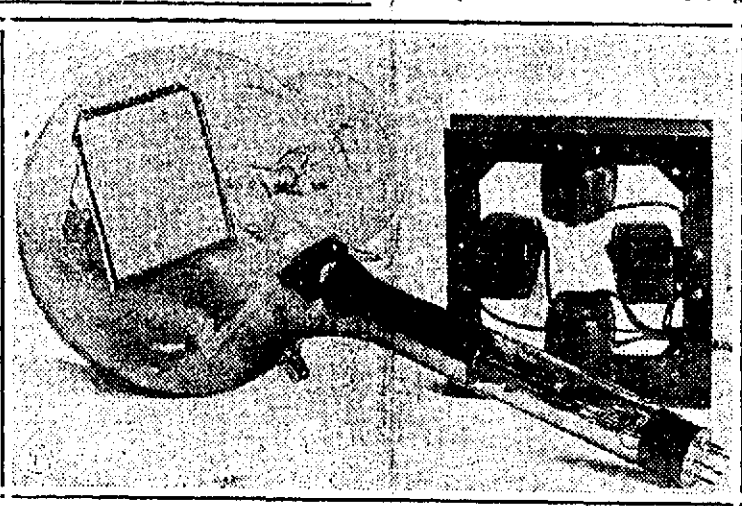

The only problem now is how this new invention will act when it is put on the air—what effect skyscrapers, automobiles, vacuum cleaners, toasters and curling irons will have on radio waves put on the air under the high power required to drive the waves across roof tops to your antenna.

A fund of \$1,000,000 is available to check and double check the new television system, whose future will be decided by the results obtained in the use of about 100 test receivers. When

(Continued on page three)

The Coming of Television!

The long-awaited appearance of television on the American market is forecast in this article describing the final tests being conducted from atop the Empire State building in New York City. Commercial sale of television sets must await removal of the last mechanical "bugs," however, which may be a year, or four or five years at the outside.

Finest Cotton Crop in Sight for State

Condition in July Believed to Be Best in Arkansas' History

LITTLE ROCK.—L. B. Forbes, analytical chemist, reported Friday that on a recent trip through southeast Arkansas with P. F. Cleaver, he saw "the finest stand of cotton for this time of year that Arkansas has ever had."

Mr. Forbes and Mr. Cleaver visited Pine Bluff, Hampton, Fordyce and Sherwood. Ginners and cotton oil men said that the crop will exceed 1,200,000 bales if there is light rain in late July and early August. But even if the dryer weather continues, 1,000,000 bales would be a conservative estimate, Mr. Forbes said.

The only danger of curtailment of the crop, he said, would be an attack by army worms and boll weevil or a wet August when the bolls are maturing. There is sufficient moisture in the soil to assure a fine crop, he said.

Mr. Forbes commented on the "yard-long smiles" of the farmers and ginners.

The fields he observed ranged from lowland and bottoms cotton to hill fields.

Hope Men to Aid Boy Scout Circus

Rev. Thomas Brewster and Foy Hammons on Tex-Ark Council Committee

The Rev. Thomas Brewster and Foy Hammons of Hope have been named the Cubbing Event Directors of the Boy Scouts Circuit which is to be presented sometime this fall in the Grinn stadium at Texarkana, Texas.

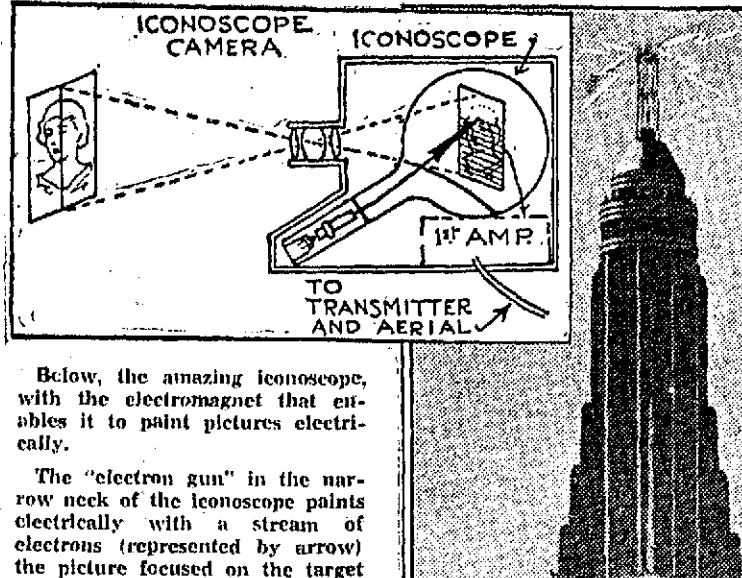

The circus, which will be participated in by approximately 2,000 Scouts of the Tex-Ark Council, and by some 200 Scout leaders and interested persons, is characterized as the most ambitious program ever attempted by that council, which is comprised of twelve counties in three states.

In naming Mr. Hammons and the Rev. Mr. Brewster to the position, W. H. McMullen, Tex-Ark Council Scout executive, said:

"In our search for capable men throughout the area to assist in the preparation and presentation of this huge enterprise, we have been fortunate in locating men peculiarly fitted to execute the particulars of each of the 12 acts that will comprise the two-hour gigantic spectacle."

"Our search for able and interested men has extended throughout the Tex-Ark Council, and in the acquisition of Rev. Brewster and Mr. Hammons, we have gained a distinct advantage in that we have enlisted the services of men whose ability as Scout leaders is pronounced and whose efforts to complete their part of the program will be guided by that interest in the young boys of this council."

Below, the amazing iconoscope, with the electromagnet that enables it to paint pictures electrically.

The "electron gun" in the narrow neck of the iconoscope paints electrically with a stream of electrons (represented by arrow) the picture focused on the target.

Mrs. D. M. City, 56, Dies at Ozan

Funeral Service to Be Held From Residence at 4 p. m. Sunday

Mrs. D. M. City, 56, died Friday at her home at Ozan. She had been ill three months.

Mrs. City had been a resident of the Ozan community 20 years, moving there from Prescott, where she was born and reared.

Funeral services will be held at 4 p. m. Sunday from the family residence, conducted by the Rev. Frank Moore of Homer, La., a nephew of the deceased.

Burial will be in St. Paul cemetery, near Ozan.

Surviving are her husband, D. M. City of Ozan; one son, Rector City of Taylor, Texas; three sisters, Mrs. B. Moore of Homer, La., Mrs. Clair Oakes and Mrs. Dora Battle, both of Augusta, Ark.

Two grandchildren also survive.

McCorkle Reports Rotary Convention

Outlines Atlantic City Proceedings to Hope Club Friday

A resume of proceedings of the Rotary International convention held at Atlantic City, New Jersey, was outlined for the local club at its weekly luncheon Friday noon at Hotel Barlow by Ed. McCorkle.

Mr. McCorkle attended the convention as a delegate of the Hope club. The convention was held from June 22 to 26.

The local club had three guests Friday, W. M. McMullen and Ed Berry of Texarkana, and T. Simms Holder of the district WPA office here.

The dancer who turned gold-digger also has mining interests in Montana and frequently makes airplane trips to that state. Her husband, is Joseph Morgan, employed at an El Dorado county mine. They have two children.

Mrs. Storey charged that her husband transferred his affection to Mrs. Morgan and that on several occasions he had travelled with her to small outlying towns. She took charge of the mine about a year ago.

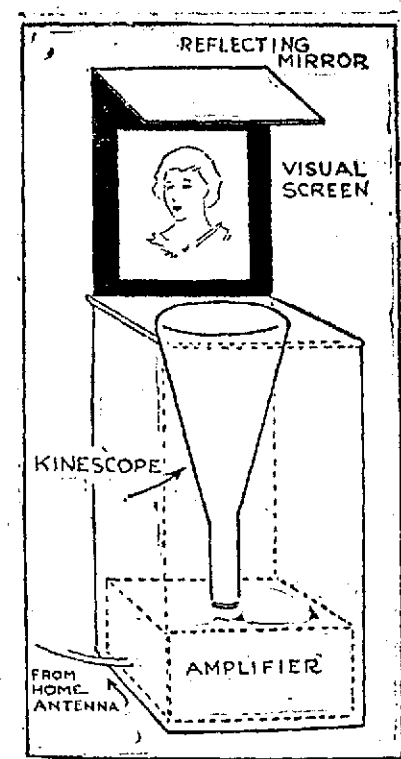

Mrs. Morgan's partner in the mining venture is J. T. Eoyat, Placerville, Cal., consulting engineer of the Consolidated Mines of South Africa.

When, Not If, Is Question Engineers Work on Now

Heat Wave to End on This Week-End

Relief Moves Out of Northwest—Death Toll Placed at 536

CHICAGO.—(Copyright Associated Press)—The end of the heat wave was sighted Saturday and millions cheered.

Cool weather should begin to sweep eastward from the Northwest Saturday night.

Forecasters J. R. Lloyd, of Chicago, said the torrid blanket, which has spread death to humans and growing things over the northern half of the nation from the Rockies east, would be dispelled in the northwest by rain Saturday night.

The heat and drought to date has caused at least 536 deaths, and crop damage estimated in excess of 300 million dollars. Lloyd said definite indications of a breakup in the heat in the Northwest were seen, and predicted scattered rains.

In a wild selling wave wheat prices smashed downward 5 cents, the limit permitted by trading rules, on the Board of Trade Saturday, and corn was carried to a loss of almost 7 cents from early high records, on news that the end of the heat wave was predicted.

A Bitter Picture

CHICAGO.—(AP)—Both West and East continued to suffer in the fierce heat wave which continued for its eighth day Friday. The blanket of hot air covered most of the United States and much of Canada.

The total of drought losses, estimated at \$300,000,000, continued to grow. Upwards of 375 fatalities for the past four days were tabulated as temperature records were broken from the Mississippi valley to the Atlantic coast.

Some of the day's highest maximum temperatures were: Cumberland, Md., 107.5; Jamestown, N. D., 107; Cincinnati 105, Kansas City, Louisville, Richmond and St. Louis 104, Chicago, Detroit, Mich., and Birmingham, Ala., 102 and New York and Pittsburgh at 100.

Hundred-degree heat was the standard from Kansas to Connecticut, with every hour bringing additional fatalities ascribed to heat or drowning as thousands sought respite on beaches; the indications were that the day's list would be the heaviest for the long dry hot spell.

New York state led in early tabulations of deaths with at least 17 for the day. Ohio counted 10, Michigan and Wisconsin nine and Illinois seven.

In dozens of cities residents planned to sleep in parks or yards. In a convention hall at Troy, N. Y., 29 women fainted. The heat caused \$50,000 damage to highways in Ohio. No immediate relief was in sight.

With generally fair weather prevailing over the Northern half of the nation, forecasters expected at least a few more days of abnormal heat. The drought continued to threaten the potential food supply and a threat to the pocketbook consumers.

All Guests Saved; Headquarters of 2 Candidates Razed

Offices of Bill Denman and Arthur Johnson Are Wiped Out

DAMAGE IS \$75,000

Flames in Small Cafe Spread to Hotel and 12 Adjoining Stores

LITTLE ROCK.—(AP)—Fire originating in a small cafe in the New Merchants hotel building swept the hotel and 12 business establishments in the structure Saturday with an estimated loss of \$75,000.

The hotel manager said the 50 guests were accounted for.

Only the shell of the building remained standing as firemen drenched the ruins.

Most of the guests escaped down fire and regular exits, others being taken from the building by fire-ladders. The building was located at Third and Louisiana streets.

The first firemen to arrive found guests leaning out of the second and third story windows calling for aid. More than 25 reached the ground by way of fire-escapes, many in their night-clothing.

Fire officials said they learned that the blaze in a small cafe followed a muffled explosion. Three firemen received injuries as a result of the fire.

The blaze ravaged the campaign headquarters of U. S. senator, Prescott Johnson, candidate for governor, both headquarters being housed in the New Merchants hotel.

The guest list handed out by the manager of the hotel included C. Marsh of Prescott.

No Administration Candidate As Yet

Nothing to Indicate Support of Cazort, McDonald or Bone

LITTLE ROCK.—(AP)—Rumor, surmise and "grapevine" reports about the governor's race Friday bolstered the conclusion, already generally accepted, that at this writing there is no such thing as an "administration" candidate.

Conferees, held almost daily for more than a week, continued, and out of them came nothing to substantiate a report that Governor Futrell and co-operating appointive executives had eliminated from consideration all except Lieut. Gov. Lee Cazort, Secretary of State Ed F. McDonald and Circuit Judge Marcus Bone.

Attorney General Carl E. Bailey has made no pretense of seeking administration backing and his entry into the race was met with predictions that an effort would be made to line up administration forces behind any one who seemed to have the best chance of defeating him since he had long been critical of the governor's political policies.

Former Comptroller Howard Reed, who was a candidate against Governor Futrell in 1932 and 1934, assumed the role of anti-administrationist when he said his fee.

But all except Bailey and Reed have been looked upon as possible administration selections. Nothing came from headquarters of Senator Arthur J. Johnson, Senator John C. Ashley, former Gov. Tom J. Terral or County Judge R. A. Cook Friday that would indicate either of them was conceding administration support to Cazort, McDonald or Bone.

Most of the headquarters officials said they had no intention of doing anything except proceed with the campaign without reference to the attitude of the governor's group.

Dave Portman, Van Buren lawyer, was one of the aspirants classified with the pro-administration group.

(Continued on page two)

Turned Brown

By Brown Turner

MEMPHIS, Tenn.—(Special)—Drought's cut the hay crop in this country so that it has discouraged a nationally-known weekly from pestering people with a straw vote election. That helps some.

Grocery store man this morning interrupted a foreman on a WPA project long enough to ask him what he was doing.

With generally fair weather prevailing over the Northern half of the nation, forecasters expected at least a few more days of abnormal heat. The drought continued to threaten the potential food supply and a threat to the pocketbook consumers.

Hope Star

O Justice, Deliver Thy Herald From False Report!

Your Baby's Health

By DR. MORRIS FISHEIN
Editor, Journal of the American Medical Association, and of Hygeia, the Health Magazine

The most frequent illness of babies is the common cold. Usually this is not serious, but everything possible should be done to prevent secondary bronchitis, pneumonia, or an infected ear.

Children who are well fed and well taken care of, with proper attention to hygiene, are much less likely to catch cold than those who are undernourished and constantly exposed to changes in temperature and crowded conditions.

The child who has plenty of sleep, exercise, fresh air, and sunshine is more likely to resist cold than is the one with improper hygiene.

Air in the child's room should be suitably moistened by evaporation of water from the radiator, or by use of a humidifying device.

It is now possible to purchase, at small cost, an instrument which tells the humidity of the room. The average house is about 20, when it should be 45 to 50 in winter.

People with colds should not be permitted to come near babies, particularly those who are delicate, for these catch cold much more easily than do adults who are accustomed to colds.

Large tonsils and adenoids also seem to make children more susceptible to colds than are adults. If a child is found to have large, or infected, tonsils and adenoids, these should be removed. It is the universal opinion that children who have had infected tonsils and adenoids removed suffer less frequently with sore throats than they did before.

In preventing colds in children the

diet should contain adequate amounts of cod-liver oil, and the amounts of carbohydrates should be lessened. The clothing should be of medium weight, and care should be taken to avoid chilling after perspiration. The sleeping room should be cool.

The child should have a lukewarm or slightly cool sponge bath in the morning, given in a warm room and with the feet in warm water. This bath should be quite short—less than a minute—and should be followed by a brisk rub with a towel. The warm bath should be taken at night.

Use of showers or injections to prevent colds is not yet established as really useful, although many physicians are inclined to believe that these injections help.

When adults in homes in which there are small babies develop colds, they may wear gauze masks to cover nose and mouth, and in that way prevent transmission of colds to the babies.

At first sign of a cold, the child should be put to bed, its food lessened, and the doctor should be called. If there is fever, the doctor should be called. The child should not be permitted to get up until one day after it has recovered from the cold. Then it should be permitted to play in the house, but not to go outdoors until it has certainly recovered. It may then go outside for brief periods until it is free from secondary symptoms, including discharges from the nose.

When babies are sick with colds, they should not be overdone with widely advertised cold remedies, since many of these remedies contain drugs which may be dangerous.

was a little hurt by the story that he and the lion had been practicing putting their heads into each other's mouths.

The truth of the incident is that Brown, working in "The Circus Clown," was in the cage trying to escape the lion's head for a bit of acting. He gave it a couple of jolts, but it went right on with its siege.

Somebody said, "Joe, try blowing in his ear. I've heard lions don't like that."

So Brown blew into the lion's ear, and the lion turned and bit him on the face. It made a fine shot for the camera, and audiences later rolled in the aisles at the spectacle of the comedian's discomfiture.

Best Good Guy
Kindliness is Brown's religion; he excludes it. He plays more benefits than anybody else in Hollywood. He visits hospitals. He's a sucker for hard luck stories.

A widow was about to lose a shabby little theater which her husband had left her, along with a lot of debts. Brown heard about it and played personal appearances in the theater until its obligations were met, and there was a little something left over for revealing.

If he had his life to live over again, he'd still be a comedian.

"It's a finer thing," he said, and he was serious, "than any other profession. Than medicine, even. Why, a great doctor once told me that 10 real belly-laughs will add a day to a person's life."

"Sometimes I get to thinking about that, and hoping it's true, and figuring how many days I have helped add to the life of the nation, even if only half the people who see my pictures get a few laughs from them. I'm a mighty lucky guy to be in the laugh business."

Defies Jinxes
There is a good-sized streak of perversity in Joseph Evan Brown. It may be that he stuck to show business during his early years because those times were so very lean and painfully difficult. He's anti-superstitious; deliberately flouts the standard jinxes, such as breaking mirrors and whistling in dressing rooms, as a gesture of defiance.

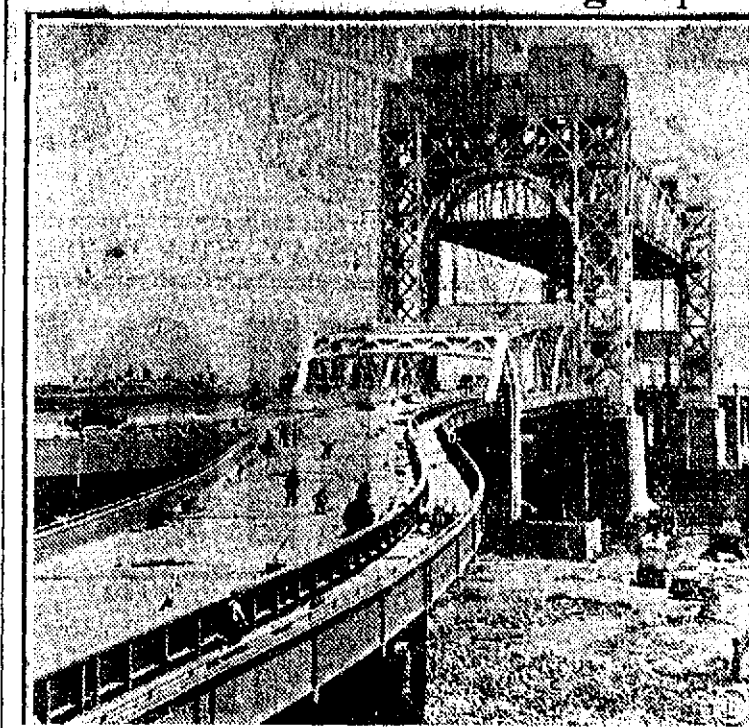

Use of the same way, his insistence on clean comedy is a hammer of revulsion against his early comedy training in burlesque. Brown was scarcely more than a kid when he tramped with "Uncle Sam's Belles." "The Girls of the Moulin Rouge," and like enterprises. But he insists that he never told an improper joke.

"Neither have I ever impersonated a cripple," he said. "Nor even a person who stutters. No use hurting anybody's feelings. I don't like practical jokes, either."

Wholesome Jester
He enjoys a bit of ribbing now and then, however. Brown is a fine dialectician, and when he recognizes the voice of a friend on the telephone he may pretend to be a very stupid Oriental houseboy, or maybe a German wrong number.

Recently he heard that an important executive was having a costly new car repainted in flashy colors, blue with a red stripe. Brown telephoned him and in 20 minutes of heavily accented conversation broke the news

As Motorist Sees Tri-Borough Span

A motorist's-eye view is this picture of the Manhattan approach to New York's Tri-Borough bridge. Straight ahead is the drawbridge across the East River, one of the series of spans that comprise the vast project linking Manhattan, Bronx and Queens.

Grasshoppers Give Lake Fish a Feast

Bass and Crappie Churn Surface of Lake Hamilton to a Foam

HOT SPRINGS, Ark.—An unusual sight was witnessed Friday on Lake Hamilton. Several thousand grasshoppers, making an invasion into Garland county from the western part of the state, either from exhaustion, thirst or heat, alighted on the lake, and almost immediately attracted a fish for every insect. The water was churned into foam as hundreds of bass, crappie and other game fish for which the lake is noted gobbled the best bait that ever came their way.

A little accident to the beautiful red car with a blue stripe. What that wasn't the color scheme?—well, that's the way he had painted it.

But it didn't make any difference anyway, said Brown, because he had dropped a match in a can of paint, and the paint had burned up, and so had the car. The victim of the joke burned up, too—spontaneous combustion.

Brown's domesticity, including 20 years of married life and three children, is at once the pride and despair of the bosses. The actor sometimes shows up a couple of hours late at the studio with what seems to him a perfectly valid excuse.

"Sorry," he'll say, "I got to fooling around with the kids."

Behind the Scenes in Washington

By Rodney Dutcher

(Continued from page one)

ocrat, it's the simplest thing in the world to whittle down the cost of the New Deal to less than \$7,000,000,000. You begin by asserting that the guaranteed bonds are adequately covered by security and hence are no liability. You then point out that the treasury's cash balance is \$2,200,000,000 larger than when Mr. Hoover and Mr. Mills checked out of Washington, and subtract \$13,000,000,000, which leaves \$10,800,000,000.

Then deduct that \$2,000,000,000 "profit" from gold devaluation which is now in the currency stabilization fund, leaving \$8,800,000,000.

Then a couple of billions more in loans by RFC, PWA, and other federal agencies which are supposed to be recoverable. By this time you're down to \$6,800,000,000 and there are plenty of officials here who can think of more deductions if you want them.

But the difference between \$17,000,000,000 and \$6,800,000,000 would seem to be enough difference to accommodate plenty of campaign charges and alibis.

The church of Hagia Sophia, in Constantinople, and St. Mark's, in Venice, are judged the finest examples of Byzantine architecture.

A wind tunnel, similar to those used in testing airplanes, has been installed in Pittsburgh to test streamlined locomotives and street cars.

No Administration

(Continued from page one)

but he withdrew from the race Thursday.

Governor Fretwell Friday night declined to comment upon the situation but it is known that he has discussed it with political leaders from several sections and with heads of state departments.

At least two state officials who are known to stand high in administration councils, said "there is no administration candidate" and that the administration is not attempting to eliminate any candidate or groups of candidates. They would not say how long this situation will continue and there appeared to be a division, or several divisions, of opinion as to what course the administration forces should pursue.

Some express belief that the governor will continue his announced "hands off" policy. Some thought he might elaborate by reiterating that he will take no active part in the campaign and by publicly releasing his appointive departments to support the candidate of their choice.

There were others, however, who expressed the opinion that administration forces will attempt to stick together to put over one of the candidates friendly to the administration.

Chips Off the

(Continued from page one)

bicycle craze and was one of the prominent wheelmen on Pennsylvania avenue.

Some "city slickers" in congress thought at first that Farmer Simpson would be fair game to their dialectic talents. But after two or three disastrous encounters with Jerry's stinging repartee and whimsical ridicule, they let him alone.

His purported uncouthness masked a tip-of-the-tongue familiarity with the classics, as well as political history and economics, and an inherent graciousness. He was a powerful campaigner, building up his arguments in logical sequence, speaking very dispassionately for a "rabble-rouser" and putting his adversary in a ridiculously untenable position.

Ridicule Becomes Respect

There is a story that a sedate Washington lady said to him:

"Mr. Simpson, would you mind showing me whether you really wear hose or not?"

"Not in the least, Madam," Jerry graciously replied, adding quickly, "And you will reciprocate, of course?"

He readily crossed oratorical swords with the powerful Tim Reed, czar of the house before Joe Cannon took over the speakership. Although famous in story and verse when he first became a national figure, he turned ridicule, in time, to respect and admiration.

Jerry served three terms in congress covering the periods 1891 to 1895 and 1897 to 1899. Shortly before his death in 1905 he remarked in lamenting the disintegration of the Populist party:

"Think of me as a laid agent for a corporation and then burst out crying."

Next: The Bull Moose Revolt.

By Helen Welshimer

A wise doctor made a remark the other day that is well worth the quoting. Dr. Morris Fishbein, eminent medical authority, who edits the Journal of the American Medical Association and writes the health column for NEA Service, gave a challenge to the women of the nation.

He said: "In the average family, with a mother and a daughter, more is spent for the care of the women's hair,

Private Number New Saenger Film

Robert Taylor and Loretta Young to Open 3-Day Run Here

Starring an exciting new love team, handsome Robert Taylor and lovely Loretta Young, "Private Number," the new Fox triumph showing Sunday, Monday and Tuesday at the Saenger, is being acclaimed one of the year's outstanding romantic hits.

Basil Rathbone

Taylor's debonair manner and youthful banter complements Miss Young's beauty and wide-eyed appeal perfectly. And, added to the thrilling love story, is suspense, drama and comedy by the irrepressible Patsy Kelly. Basil Rathbone and Marjorie Gateson are also featured prominently in the supporting cast.

Memphis Newspaper Man Vacation Visitor Here

F. E. Plowman, financial editor of the Memphis Press-Scimitar, was a vacation visitor in Hope Saturday, calling at The Star office during the morning.

including cutting, wave-setting and permanent waving, then spent on medical care for the whole family. The appeal of fashion is greater than the appeal of health, in other words.

"Doctors must educate the public, study the situation, and experiment in new forms of selling and paying for medical service, just as was done by those who sold radios to sell. It is purely an economic question."

Punctual About Marcell
Women who would not miss the regular date for a wave, cheerfully paying the price of transient beauty, completely neglect to budget towards health.

"How do I know that I will ever need an appendectomy?" they ask. Well, how do you know that you won't? Isn't the peace of mind which comes when your health is insured worth the few dollars which make up a health budget? Isn't it more important to be able to have an operation when it is needed than to have a marcel the day if the literary club meeting?

Isn't it more sensible to know that your dental work is taken care of that your dental work is taken care of than to apply toothache medicine to a decayed molar while skillful fingers try to erase wrinkles?

Health Comes First
Certainly beauty is its own excuse for being. When it is a synthetic product, bought at the cost of health, however, it is as flimsy and fragile as a piece of cellophane. Anyone can see through it! Without a sound health basis, there can be no beauty.

"But maybe I will never need medical aid! In that case, my saved money will never help me," you may say.

It will bear dividends, never fear. Dividends in peace of mind that will obliterate wrinkles and brighten eyes. Then, too, you will have the necessary physical and dental examinations, at regular intervals, when your budget permits them. You will not be taken unawares, some day, by a swift, sure pain which necessitates a critical operation that could have been decreased in danger or avoided if the disease had been caught in time. You will be playing safe, not on a margin.

As Important as Rent
Budgeting for health should be as much a part of the distribution of the family income as budgeting for rent and food and fuel. Mothers who insistently tell boys and girls to be grateful that they have their health—when those boys and girls bemoan the lack of jobs—are not talking idly.

If you have health—and keep it—success, happiness, peace of mind, sympathy, understanding—all these things and many more will be added unto you. When health goes, wrinkles will come in spite of the massage, and hair will fade though the wave is set with infinite care.

It is time that the medical profession, behind its barricade of ethics, hung out a practical warning. It is the profession's humanitarian duty to educate people to invest in health.

Indian teak companies lose several elephants each year because of cobra bites. A bite on the tip of trunk, or on the foot at the base of the toenail, proves fatal to an elephant in about three hours.

A small lock of Napoleon's hair, cut off in St. Helena, brought only \$5.25 at an auction in London in 1932.

Natives or Tristan da Cunha, a tiny island of the South Atlantic, have never owned tooth brushes, but 84 per cent of them have perfect teeth.

The poisonous element in poison ivy is a heavy, non-volatile, oily substance, chemically related to phenol, or carbolic acid.

Political Announcements

The Star is authorized to announce the following as candidates subject to the action of the Tempstead county Democratic primary election Aug. 11, 1936:

For Representative
EMORY A. THOMPSON
LUKE MONROE
HUGH D. CLARK
JOHN P. VESEY

For Sheriff & Collector
FRANK WARD

For County & Probate Judge
RUFFIN WHITE
FRANK RIDER

For County Treasurer
CLIFFORD FRANKS
H. M. STEPHENS
MISS LILLIE MIDDLEBROOK

For Circuit Clerk
ARTHUR C. ANDERSON
RALPH BAILEY
W. A. FORMBY

CLEANERS & HATS

Your Children

By Olive Roberts Barton

There must be peace in family life if nothing else. It takes character to remember this, and to act accordingly. Nothing is so contagious as a bad temper, nothing so depressing as complaint. How useless both are, and how childish!

It would be a grand thing if every mother and father could change places once a week. But even this would hardly help to a better understanding of each other's difficulties, because it is impossible to hop into another's shoes and feel like him. All of us develop obsessions about our work that even our partners could not understand in a thousand years.

Mary Feels Neglected
Mary has been up half the night with the baby. She gets up to another hot, hard day. John, she thinks bitterly, has had a full night's sleep and off in that office thinks he's working when he adds up a few figures. He comes home at six, expects his dinner and then doesn't help with the dishes. He won't even take her to a movie.

When John goes to work, he has a feeling, however, that he has left Mary secure in a house fairly comfortable. She will have food and at least some conveniences. She will be busy, yes, and tired, too, poor girl, but she's desperately tired, the way he feels so good of the time, she can get her head on a pillow for a few minutes once in a while.

Maybe the work will have to wait, but once in a corner Mary can let it go at that and get some rest. Moreover, she's her own boss. Nobody to crack a whip over her head or blame her for not getting an invoice out or to hint every other hour that better men than he is are out of jobs.

Working Under Strain
Hours in the office facing a drab wall, the clack of typewriters and

adding machines driving rivets into his brain. Sometimes he thinks he'll have to rush out, knock down a few pedestrians and then drive off the bridge. He needs to exercise and stretch his muscles. But by six he is so mentally and spiritually fatigued a carpet heater, or even a dish cloth, irritates him further.

Mary says the installment man was there, the wheel on the buggy is off, she's had a headache and for all he cares she could die and good riddance.

John, seething inside all day over the pettiness and nagging of the office manager, holding in because if he didn't both Mary and the baby would starve, now turns on her and lets her blast. An explosion is necessary to relieve his tortured feelings, so Mary begins near and rubbing salt in the wound, although she doesn't guess, gets the broadside.

Maybe it is to be this way. Character is one thing and limit of endurance another. Both are tired, each thinks the other does not give them credit; life is no bed of roses and looks as bleak as the bottom of a dry river-bed.

But Mary Made Allowances
That John is pegging away at a distasteful job day after day to give her a certain security and independence. John, that Mary is fighting her way every hour under the pressure of a dozen annoyances and discouragements, rearing his child as well as hers and being as brave about it as a woman of Mary's undeveloped type can be. He must give Mary time to cultivate emotional strength and be as patient as he can.

Not until husband and wife learn to respect each other's troubles and allow for them, forgive special failings and understand the battles each is fighting alone, can there be peace. And there should be peace.

Good Timber

The tree that never had to fight
For sun and sky and air and light,
That stood out in the open plain
And always got its share of rain;
Never became a forest king,
But lived and died a scrubby thing.

The man who never had to toll
To heaven from the common soil,
Who never had to win his share
Of sun and sky and light and air;
Never became a manly man,
But lived and died as he began.

God timber does not grow in ease;
The stronger wind, the tougher trees,
The farther sky, the greater length,
The more the storm, the more the strength.

By sun and cold, by rain and snows,
In tree or man, good timber grows.

Where thickest stands the forest
growth,
We find the patriarchs of both;
And they hold converse with the stars
Whose broken branches show the scars

Of many winds and much of strife—
This is the common law of life.

—Douglas Mallock.

Mr. and Mrs. O. G. Taylor of Crowley, La., are house guests of Mr. and Mrs. D. A. Bowden.

Mrs. Olin Martin and son David of Los Angeles, Calif., arrived Thursday for a visit with their mother, Mrs. W. G. Boyles.

Mrs. James L. Jamison has returned to Texarkana after a week's visit with home folks.

The different Circles of the Woman's Auxiliary of the First Presbyterian church will meet Monday afternoon at 4 o'clock in the following homes: Circle No. 1, with Mrs. Craig Roshborough, South Elm street; Circle No. 2, with Mrs. C. W. Torpley, South Main street; Circle No. 3, with Miss Mary Carrigan, North Elm street; Circle No. 4, with Mrs. W. Y. Foster, North Main street.

Miss Phila Tharp is spending the week end in El Dorado, the guest of Mr. and Mrs. Surrey Gilliam.

Mrs. Gus Rowland of Idabel and sister, Mrs. Thilia Scott LeMay and daughters of Lewisville were Friday visitors with relatives and friends in the city.

Mr. and Mrs. D. A. Billingsley have returned to their home in Houston, Texas, after a visit with their brother, D. A. Purcell and Mrs. Purcell.

Andy Womack and Miss Mary Esther Womack have returned to their home in Fordyce after a week's visit with Mr. and Mrs. H. W. Hatcher.

With Mrs. Lucy Bennett of Dallas, Texas, as special guest, Mrs. R. V. Herndon entertained the members of the Friday Bridge club on Friday afternoon at her home on South Main street. Lovely summer flowers adorned the card rooms which were arranged for two tables. The club favor went to Mrs. Comer Boyett and the honor guest received a dainty gift. Other guests than the club members were Mrs. R. D. Franklin and Mrs. L. W. Young. Following the game, a delicious ice course was served.

Miss Maxine Boyett has as week end guest, little Miss Ruth Mabrey formerly of this city, now of Aberdeen, Miss.

R. M. LaGrone has joined Mrs. LaGrone in Hot Springs for a week's visit.

The W. M. S. First Baptist church will meet at the church Monday after-

noon at 4 p. m. for missionary program with Circle No. 2 in charge of the program.

Mrs. Wilbur Jones of Ozan was a Friday shopper in the city.

NEWS CHURCHES

OUR LADY OF GOOD HOPE

Sixth Sunday After Pentecost

The Rev. Charles F. Stanowski, the recently appointed pastor of Our Lady of Good Hope church and mission territory, will begin his pastorate with Mass at Magnolia at 8, arriving in Hope for the Mass at 11 o'clock. 10:15—Morning Prayer. 10:20—Catechetical Instructions. 10:40—Spiritual Reading. 11:00—Holy Sacrifice of the Mass. 6:30—Study "Our Sunday Visitor." 7:30—Benediction with the Most Blessed Sacrament.

FIRST METHODIST CHURCH

Fred K. Harrison, Pastor

Church school 9:45 a. m. Morning worship 10:55 a. m. Sermon subject: "Jesus, the Enemy." Intermediates and Young People 7 p. m.

Night service 8 p. m. on the church lawn. You are invited.

CHURCH OF CHRIST

Gilbert Copeland, Minister

We wish to take this opportunity to thank the people of Hope and surrounding communities for their splendid co-operation through our revival meeting that has just closed. It was all that we could ask for, and we appreciate the interest that was shown to the fullest extent.

We would not forget to thank the Hope Star for their splendid co-operation in this work. They have been very nice to us in the daily announcements, and we extend to them our deepest sense of gratitude.

The revival left the church in the very best condition. It was a great success. Our services for Lord's Day are as follows:

Bible classes at 10 a. m. Preaching at 11 a. m. Young People's meeting at 7 p. m. Frolicking at 8 p. m. The subjects for discussion are: "Precious Words" and "Worship."

Prayer meeting on Wednesday evening at 8 p. m. Ladies Bible class Thursday afternoon at 3 o'clock. You are invited to attend these services.

ST. MARK'S CHURCH

Services Sunday July 12, 1936

Holy Eucharist 7:30 a. m.

Church School 10 a. m.

Holy Eucharist sermon 11 a. m.

HOPE GOSPEL TABERNACLE

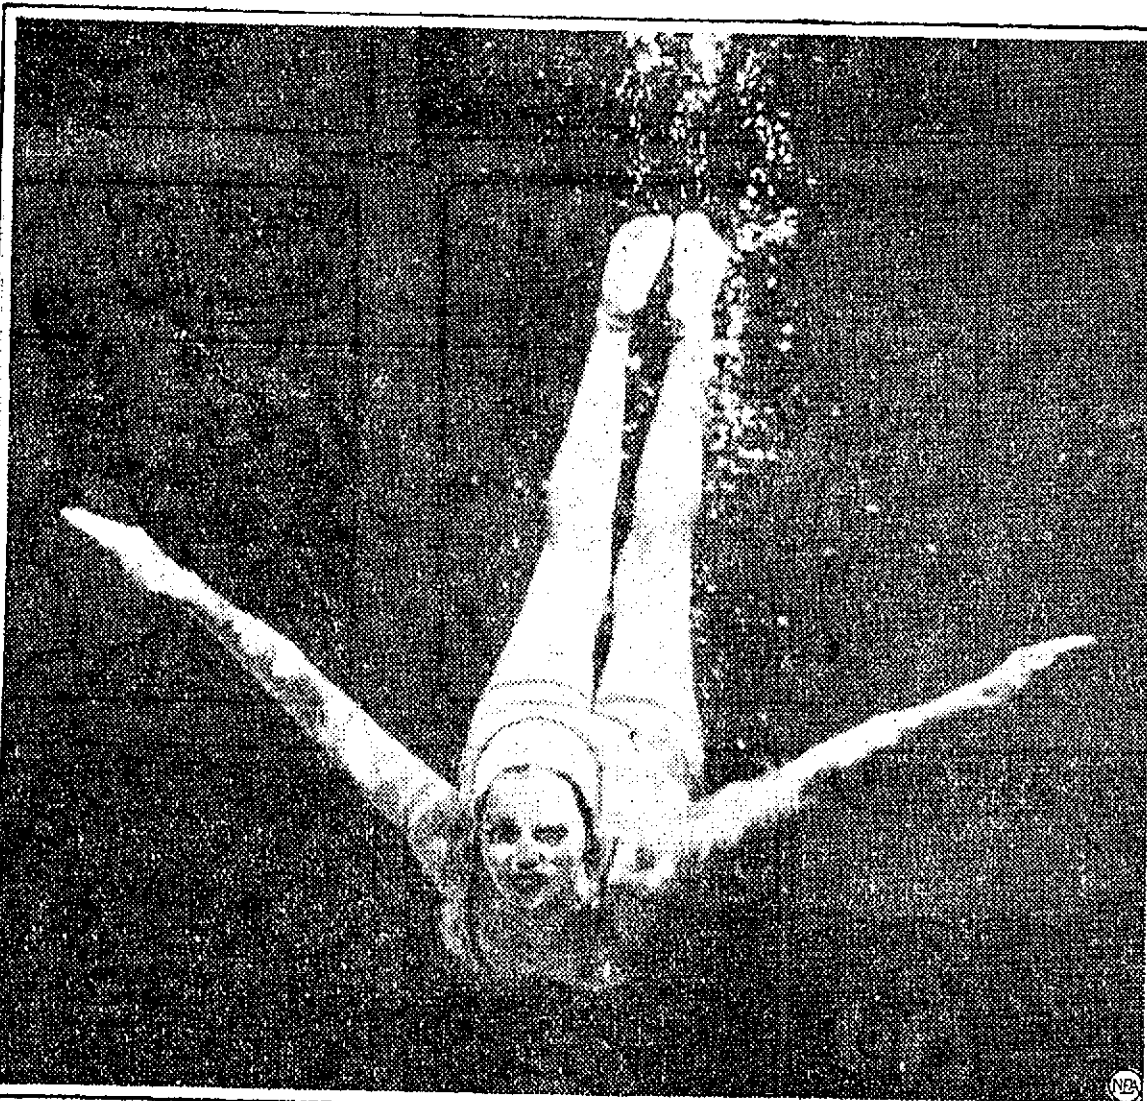

Bert Webb, Pastor

One of the largest crowds in several months filled the Hope Gospel Tabernacle last Sunday night for the 8 o'clock evangelistic service. An enthusiastic congregational song service gave the meeting a fine start and then the splendid sermon by Rev. Eupha Beasley was a blessing to all. This Sunday the pastor will speak on "Am I My Brother's Keeper?" in the evangelistic service at 8. A special sermon is promised for the church at the 11 o'clock service in the morning, following the Sunday school hour which begins at 9:45. You are invited to visit our Sunday school next Sunday. Christ's Ambassadors and Children's Church at 7 p. m.

Spend an enjoyable hour at the Tabernacle Sunday night, it is Hope's fun gospel center; cooled by seven large ceiling fans.

DOWN SHE GOES! And a special under-water camera registers all the grace and skill of an expert swimmer as June Eaton, Red Cross life saver at Silver Springs, Fla., demonstrates the ease with which a good guard gets around.

THE SWAN! This isn't a picture of a swan dive in midair. It's an underwater photograph of June Eaton, Red Cross life saver, taken shortly after a surface dive, as she works her way to the bottom at Silver Springs, Fla. This remarkable picture demonstrates good form in underwater swimming.

Iconoscope Is Put

(Continued from page one)

satisfactory reception under generally average conditions is regularly maintained, the receivers will be made available to the public, say the sponsors, and a new era of entertainment and enlightenment will be under way.

New Principle Employed

The imminence of television is due to the fact that Dr. Zworykin struck an entirely new principle when he devised the iconoscope and its receiving counterpart, the kinescope.

The pictures reproduced by the kinescope (that's the tube used on the receiving end) are as bright and clear and steady as a photograph, under laboratory conditions, at any rate. There is no more flicker than is apparent on the screen of a well operated moving picture theater.

To accomplish this miracle, Dr. Zworykin simply harnessed those willing workers, the electrons, which make radio reception and X-rays possible. Stated as simply as possible, this is how the iconoscope (the kinescope reverses the process) works:

The iconoscope is a huge bulb in which is mounted a large rectangular target, whose surface is a light-sensitive mosaic composed of some 70,000 cells. At the bottom of the long neck of the bulb is an electron gun, inside which the electric current causes billions of electrons to be tossed. Traveling with the speed of light the electrons rush toward the muzzle of the gun, ready to scatter in all directions. An electrostatic field takes hold of them at the muzzle, however, and directs them, as though they were bullets, at the upper left hand corner of the target.

Then the electrostatic force drags

them back and forth across the target, left to right, down; right to left, down; left to right—345 times this happens before the entire surface is covered. Then up and down again. The entire operation takes but 1-20th of a second—which means that the entire surface of the target is sprayed with electrons 20 times a second. About twenty pictures a second flash on the screen to give motion pictures.

Now, every time an electron strikes one of the cells, it creates an infinitesimal electric current. Since 70,000 cells are affected 20 times a second, that means there are 1,400,000 electrical impulses emanating from the target every second.

While this is going on, the lenses of the television camera focus the picture—it may be a football game, a theatrical scene, political speech or a

moving picture—on the target; and because the 70,000 cells are light-sensitive, the amount of light falling on any cell determines the intensity of the current developed by the electrons falling on it. In this way, the lights, shadows and middle tones of any scene are translated into electric impulses.

Again Depends on Electrons. At the receiving end, the kinescope reconstructs the transmitted picture from the 1,400,000 impulses per second, by bombarding a fluorescent screen with electrons, from another gun whose bullets are sprayed across the surface in synchronization with the iconoscope. A picture about 8 by 10 inches in area results.

According to RCA officials the greatest handicap to television lies in the need for transmitting on short

RIGHT AT HOME! Miss Eaton nonchalantly rests on the hard sand in crystal clear water as ripples above throw fantastic light patterns on the bottom, forming a beautiful setting for the under-water photographer.

waves. So far as is known now, these waves behave very much as light waves, which cannot be seen or "received" beyond the horizon. That imposes a limit of about 30 miles broadcasting radius on television. As yet no wire facilities have been created that will make possible chain transmission of iconoscope impulses by landlines. The new coaxial cable that is being tried out may overcome this difficulty.

The daily movement of tides is lengthening a thousandth part of a second every century.

New Hope

Miss Clara Paris is teaching a singing school at this place. This is her second week.

Mr. and Mrs. Webster Ross and Mr. Jones of Waco, Texas, are spending this week with Mr. and Mrs. John Ross.

Miss Mavis Clayton of Denham spent last week with Misses Roxie and Jettie Watkins and attended the singing school.

Nine families of this community enjoyed a big fish fry in front of Cannon's store the fourth of July.

Misses Roxie and Jettie Watkins returned home last week after a two weeks visit with their sister and friends of Nashville, Memphis and Paris, Tenn.

Antioch

Miss Bonnie Dougan of Blossom, Texas, is visiting her sister-in-law, Mrs. Elmore Dougan.

Little Alice Mae Dougan is spending this week with her grand parents Mr. and Mrs. W. W. Mohon, Mr. and Mrs. Jack Hickey of Dal-

Mr. and Mrs. Hickey of Dallas last Saturday and Sunday.

Mr. and Mrs. Jack Hickey and Mrs. Hickey Hickey motored to Antioch Sunday.

Misses Ernest Coffee, William Scott, Denman Wythe and Elmore Dougan left Sunday for Camp Pike to spend the next two weeks.

Mr. Henry Hickey left Monday for Dallas to spend a week with his wife, Mr. Jack Hickey.

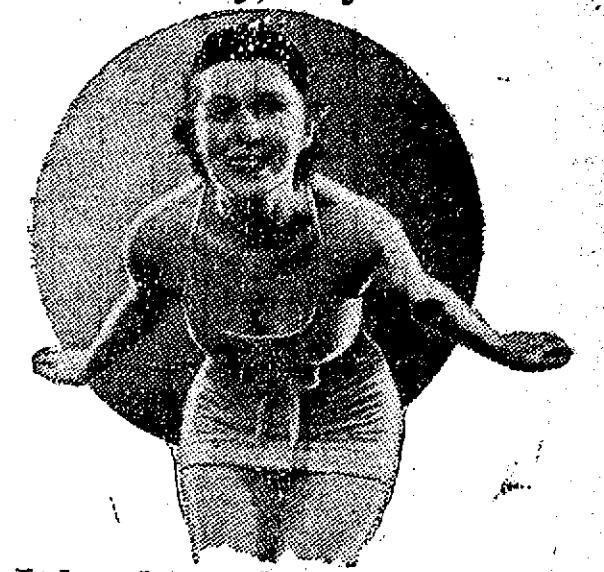

Miss Cleo Dougan has returned home after spending two months with her brother Parker Dougan at Rocky Arkansas.

Louisiana's fur crop is made up largely of muskrat pelts, of which five or six million are taken annually. Opossums, raccoons, minks, skunks, otters, and foxes help to swell the state's trapper income to about \$3,000,000 yearly.

The star Nova Herculis in 1933 changed from a star of the 14th magnitude, too faint to be seen by the naked eye, to the 15th most luminous star in the heavens, within a few days' time.

NOTICE

The pool will be open at 2 p. m. Friday, July 10th.

It has been thoroughly drained, scrubbed and refilled with fresh water.

OUR BOARDING HOUSE

MAJOR HOOPLE

EASY

WELL, SMART GUY, JUST HOW ARE YOU GOING TO RESCUE THE GORGEOUS DAMSEL WHO SAVED YOUR LIFE? YOU CAN'T USE THE LADDER ONTO THE ROOF, THERE'S A GUY—PROBABLY A SECRET COP—WATCHING IT.

THEN I'LL CLIMB UP THE CHIMNEY.

THIS IS A SET UP. WHY SHE'S IN CELL 48. JUST ACROSS THE ROOF.

HEAVENS! YOU HERE?

RETURNING A FAVOR, SWEET CHILD. QUICK, TAKE THIS SAW AND GET TO WORK.

I CAN GET THRU NOW. ANYBODY LOOKING?

NO, HURRY

DOWN YOU GO.

HOW'LL WE GET TO THE STREET?

THRU THE OFFICER'S CLUB. EVERYTHING ARRANGED.

THERE THEY ARE! SHE'S ESCAPED!

DON'T SHOOT! COLONEL WOT TALLUGGI WANTS THE PLEASURE OF CAPTURING THEM HIMSELF. HE SETTA DA TRAP.

HERE'S THE RIGHT CHIMNEY, I THINK. HOLD ONTO THIS ROPE.

QUICK, CLIPPER, OLD BOY. BUILD A FIRE WHILE I GET THE FAIR MAIDEN INTO A DISGUISE.

HOW DO I LOOK?

BEAUTIFUL! TOO BLOOMIN' BEAUTIFUL TO BE A SOLDIER, THO. WE'LL HAVE TO PAD YOUR WAIST.

NOW GRAB THIS ROPE AGAIN AND—

HEY, NIX! YOU CAN'T LOWER HER OUT THE WINDOW, SPORT—THERE'S A LOTTA COPS BELOW!

AND A LOT MORE IN THE HALL! HOLY SMOKE! I TOLD YOU THIS WAS A FRAME UP! YOU'RE TRAPPED!

ADVENTURE STAMPS by I. S. Klein

The MAGIC DRAUGHT

1936 BY NEA SERVICE, INC.

OR 30 years Ilya Murometz, Russian Cossack, had been paralyzed and could not move from his home. One day two old strangers arrived and asked Ilya to open the gate for them. He could not, he told them. His arms and legs were motionless. But the old men insisted. "Arise," they said, "and open the gate."

Ilya felt a strange twitching in his limbs. They moved and he arose and opened the gate for the men. Then, from their knapsacks, they took a cup and poured a draught into it, and they bade Ilya to drink of it. Ilya drank, and his body became warm and moist.

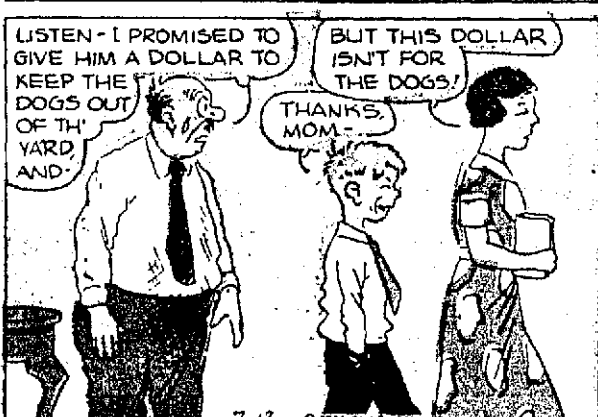

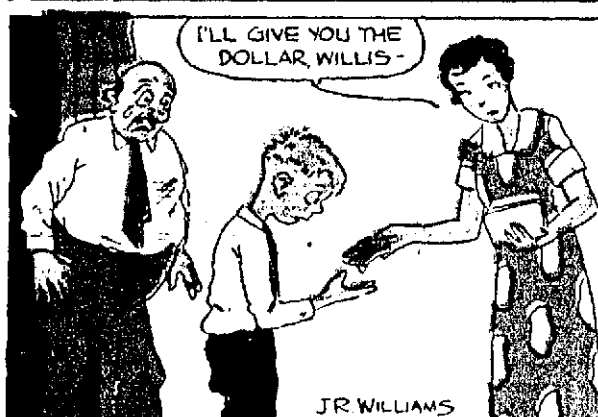

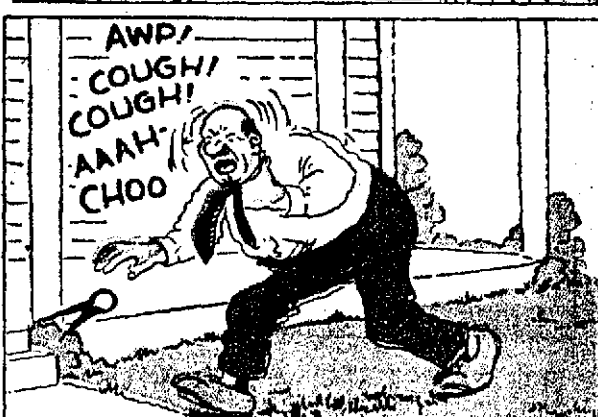

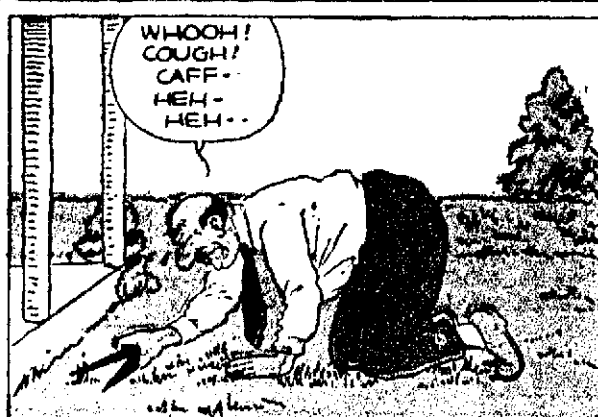

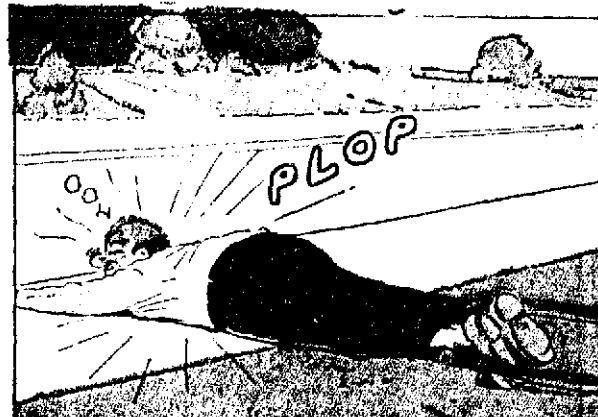

He felt a strange new power within him, and the old men told him this was the power of a great hero, who shall not die in battle, who shall fight off all oppressors and wrongdoers, and who shall bring honor and glory to his country.

And so Ilya went forth. He bought a weedy old horse and transformed it into a magnificent charger. On this he went out and slew the monsters and thieves who infested Russia.

Such is the legend of Ilya Murometz, now St. Ilya of Mouron, whose portrait appears on a Russian stamp of 1940.

THIS CURIOUS WORLD

METEORITES

by WILLIAM KERGUSON

THESE GREAT BODIES OF IRON AND STONE THAT DROP ONTO OUR EARTH FROM THE HEAVENS, ARE KNOWN AS "METEORS," WHILE THEY ARE FALLING, AND "METEORITES," AFTER THEY FALL.

BECAUSE OF THE EARTH'S MOTION THROUGH SPACE, IT IS STRUCK MORE OFTEN BY METEORITES IN THE AFTERNOON AND EARLY EVENING HOURS THE STONES TRAVEL AT A SPEED OF ABOUT 26 MILES A SECOND

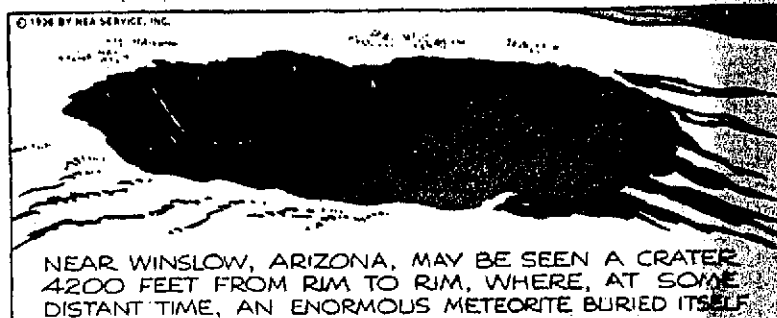

CURIOUSLY, THERE ARE NO KNOWN INSTANCES OF HUMANS BEING STRUCK BY METEORITES. IN SIBERIA, IN 1908, A HUGE STONE STRUCK THE EARTH WITH SUFFICIENT FORCE TO BLOW DOWN FORESTS OVER A ONE-HUNDRED MILE AREA, BESIDES KILLING HUNDREDS OF REINDEER.

PREHISTORIC MAN MADE WEAPONS OF METEORIC IRON BEFORE HE LEARNED TO MAKE HIS OWN IRON.

WERE IT NOT FOR THE EARTH'S ATMOSPHERE, WE WOULD BE PELTED TO DEATH BY THE STONES. ONLY A FEW REACH US BEFORE THE FRICTION, CAUSED BY AIR RESISTANCE, BURNS THEM UP.

NEAR WINSLOW, ARIZONA, MAY BE SEEN A CRATER 4200 FEET FROM RIM TO RIM, WHERE, AT SOME DISTANT TIME, AN ENORMOUS METEORITE BURIED ITSELF

FRECKLES AND HIS FRIENDS

By Blosser

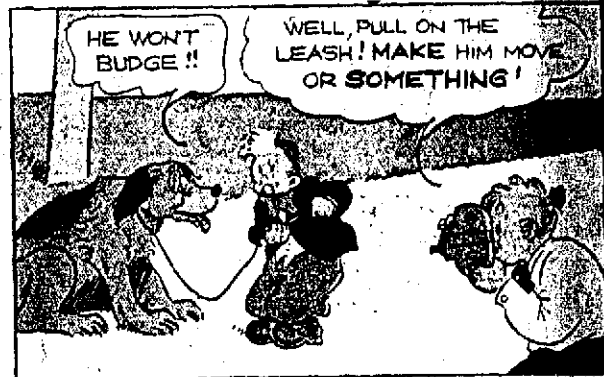

POP SAID I COULD TAKE SOME MOVIES OF POODLES WITH HIS CAMERA! YOU LEAD HIM ON THE LEASH, OSSIE!

OKAY!

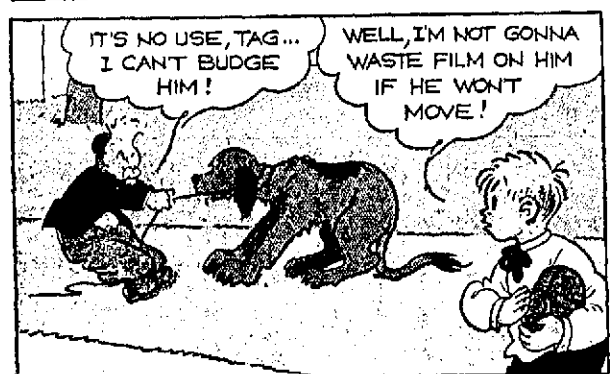

JUST WALK HIM OR DO ANYTHING, JUST SO'S WE CAN GET A LITTLE ACTION!

BE SURE AN' GET ME IN IT, TOO!

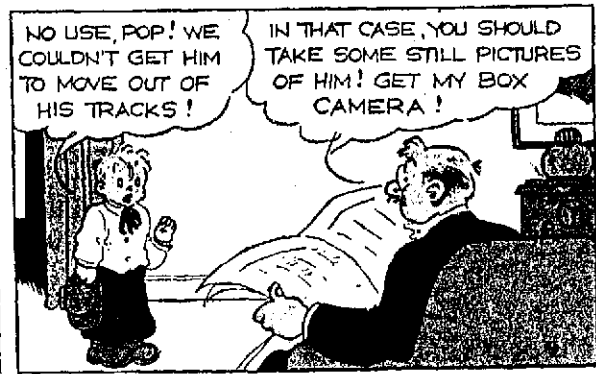

HE WON'T BUDGE!!

WELL, PULL ON THE LEASH! MAKE HIM MOVE OR SOMETHING!

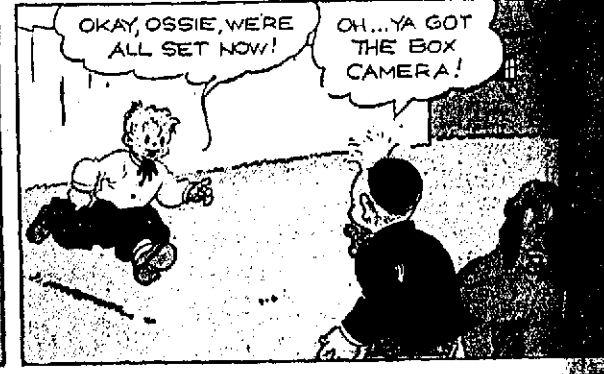

IT'S NO USE, TAG... I CAN'T BUDGE HIM!

WELL, I'M NOT GONNA WASTE FILM ON HIM IF HE WON'T MOVE!

NO USE, POP! WE COULDN'T GET HIM TO MOVE OUT OF HIS TRACKS!

IN THAT CASE, YOU SHOULD TAKE SOME STILL PICTURES OF HIM! GET MY BOX CAMERA!

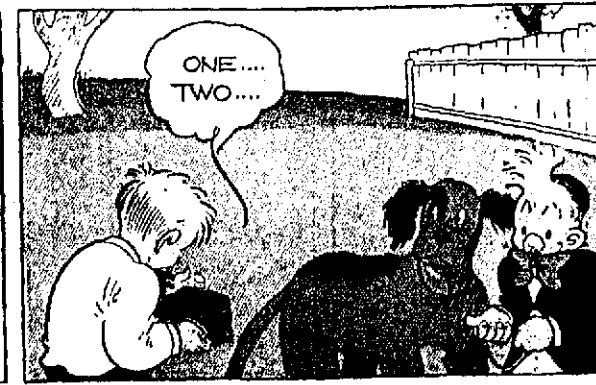

OKAY, OSSIE, WE'RE ALL SET NOW!

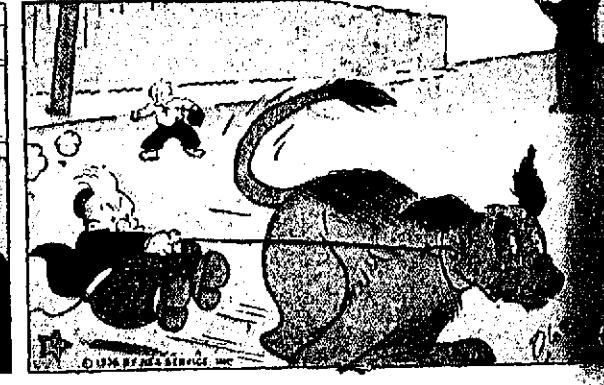

OH...YA GOT THE BOX CAMERA!

YES! YOU HOLD HIM ON THE LEASH AGAIN, AND WHEN I COUNT THREE, I'LL SNAP THE SHUTTER!

ONE... TWO...

NOW, SINCE GUZS RENIGGED ON HIS DEAL, AN' RETURNED ALL OUR AXES, I'M INCLINED TO FEEL, IT'LL BE OKAY IF OOP CAN'T STOP THIS WAR WITH ALL THESE MUNITIONS WE'VE GOT STACKED ON THE FLOOR -

-BUT ALLEY OOP, UNAWARE OF THE PRESENT STATE OF AFFAIRS BACK HOME, GOES ON WITH HIS PLAN TO HALT THE INVASION OF MOO BY KING-TUNK AND HIS LEMIAN LEGIONS -

ABOUT TH ONLY WAY I KNOW TO STOP THEIR ADVANCE ON MOO IS T'GET 'EM T'CHASE ME DEEP INTO THIS SWAMP WHERE TH' BIG DINOSAURS ARE -

I OUGHTA BE MEETIN' UP WITH KING TUNK'S ADVANCE GUARD PRETTY QUICK, NOW -

-BUT THEY'D PROBABLY BE SCARED OF DINNY - SO TH' ONLY THING FOR ME T'DO IS T'TIE DINNY UP HERE AN' GO ON AFOOT - SO WHEN THEY SEE ME, THEY'LL LIGHT OUT AFTER ME -

-THEN, WITH THEM HARD ON MY HEELS, I'LL RUN BACK AN' GIT ON OL' DINNY, LEAVIN' THEM STRANDED, WITH BIG GOBS OF TROUBLE SWARMIN' ALL AROUND 'EM -

STEADY, NOW, DINNY - STAND QUIET, OL' BOY I'LL BE BACK PRETTY QUICK - AN' THEN WE'LL WANTA GIT GOIN' IN A HURRY -

HAH - HERE THEY COME - OL' TUNK AN' HIS WHOLE GANG - NOW, HERE'S WHERE I DO MY STUFF!

LOOK! A BLASTED MOOVIAN! LOOKIT TH' FOOL! C'MON, MEN - LET'S GIT 'IM!

HOTZIGGY! LOOKIT 'EM COME AFTER ME - TH' WHOLE KABOODLE OF 'EM!

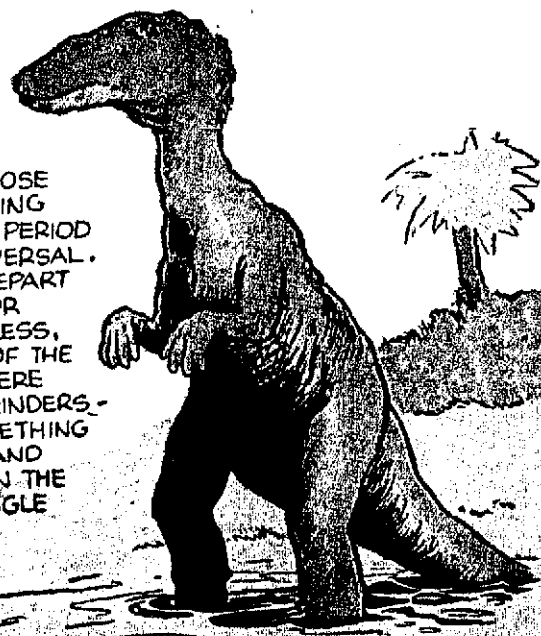

THEY'RE GAININ' ON ME - BUT I'M JUS' ABOUT BACK T'WHERE I LEFT OL' DINNY - AN' THEN WILL THEY BE A SORRY GANG, WHEN THEY FIND OUT HOW I TRICKED 'EM!

DINNY - WELL, FER!! HOYKAWOW! HE'S GONE!

DINNY, OH, DINNY! DANG THAT HORN-HEADED OL' FOOL - OH, DINNY!

EDMONTOSAURUS

ANOTHER MEMBER OF THE WELL-KNOWN DUCK-BILLED DINOSAUR FAMILY, KNOWN AS THE TRACHODONTS, WHOSE DISTRIBUTION DURING THE CRETACEOUS PERIOD WAS ALMOST UNIVERSAL. WHILE THE FOREPART OF THE MOUTH, OR BEAK, WAS TOOTHLESS, THE REAR HALF OF THE OF THE JAWS WERE CROWDED WITH GRINDERS - A TOTAL OF SOMETHING LIKE TWO THOUSAND BEING PRESENT IN THE MOUTH OF A SINGLE ANIMAL.
